

Dear Coalition Members,

As summer begins, we are pleased to inform you that we are now accepting registrations for our 2025 Federal Policy Blueprint Work Groups! Once your organization has had the opportunity to review the following information, please fill out the survey below by COB Wednesday, May 29.

As a brief reminder, the Carbon Capture Coalition's [Federal Policy Blueprint](#) (Blueprint) is our foundational, consensus-based document containing the Coalition's policy platform. It is re-released at the start of each Congress and contains a comprehensive and ambitious, but necessary, federal policy agenda to help achieve the goal of economywide carbon capture deployment to help reach net zero emissions by 2050.

Attached please find several important documents that outline the process for new and returning Policy Blueprint Work Group (WG) members:

- Process Outline, which contains a timeline and summary of Blueprint drafting activities as well as titles and descriptions for each of the five proposed WGs;
- FAQs, which contain frequently asked questions about the Blueprint drafting process and the objectives of the Blueprint; and
- Simplified Gantt Chart, which gives a quick visual summary of the anticipated blueprint timeline throughout the remainder of 2024 and leading up to the public release in 2025.

Once you have reviewed the attached documents, please use the following link to sign up to participate in each WG your organization is interested in: [register](#).

We will follow the anticipated timeline in the attached documents as closely as possible, but should we make any changes, we will be sure to notify all WG members of those changes. All WG members will receive calendar holds for individual WG meetings after the survey closes.

Thank you very much for your continued interest and participation in the Coalition. Should you have any questions, please contact Christian Flinn at [cflinn@carboncapturecoalition.org](mailto:cflinn@carboncapturecoalition.org).

Sincerely,

Carbon Capture Coalition Staff
