Subject: About Comments to OCEC's RFI for Mid-Scale DAC Opportunities
Date: Tuesday, March 26, 2024 1:22:08 PM
Attachments: [Outlook-1cvuqra3.png](#)

Dear Coalition members,

On February 29, 2024, the Department of Energy (DOE) released a Request for Information (RFI) seeking to evaluate a potential program to support mid-scale commercial direct air capture (DAC) demonstration facilities. From our conversations with DOE staff and public remarks, DOE is looking at ways to fill the TRL gap between the existing TA-2 and TA-3 DAC hubs.

Coalition staff is collecting your feedback on whether there is value in the Coalition in commenting on this RFI and would like you to complete this [quick survey response](#) by **the end of the week**. Your responses to the survey will remain **completely confidential** with Coalition staff and are simply meant to help us better outline potential Coalition comments. The survey contains four questions and should take, at most, a few minutes. The RFI will potentially be Coalition's first DAC Work Group product.

If you would like to be added to Coalition's new DAC work group or have any further questions, please reach out to Sangeet.

Regards,
Coalition Staff
